Notes on interior decorating with wood countertops:

This large wood countertop includes a number of beneficial features. Two sets of trivets are in two areas of the countertop. Trivets are the perfect solution to keep the countertop safe from hot pots and pans. Each set is integrated and composed of several routed channels that hold multiple stainless steel cooling rods. Each stainless steel rod is removable for easy cleaning. This countertop also features two 1 inch clipped corners, as well as two faucet holes and an undermount sink. To learn more about this kitchen design, read the Custom Wood Countertops Blog containing the design elements.
