---

**Notes on interior decorating with wood countertops:**

This generous kitchen is perfect for entertaining and cooking for large groups. TRK Design Company designed the custom **cherry wood countertop** for this fully functional kitchen. The countertop makes a great **raised kitchen island** or **kitchen bar top**. This design demonstrates how we can custom stain any **wood countertop** to match the cabinets in a kitchen. The black granite countertops compliment the red cabinets and **raised kitchen island**. Pre-installed in the countertop is hidden hardware. The countertop also includes two mitered joints. Sleek stainless steel appliances compliment the warm wood tones and a wine refrigerator adds extra storage for beverages. Bright green tile backsplash enhances the organic appeal of the kitchen. The large raised kitchen island provides ample casual seating for eight to ten people. Frequent lighting throughout the kitchen brings energy to the room, while allowing natural light to come in through the windows. This kitchen was completed in 2008 located in Venice, Florida.
