

ANVIL

METAL GILDED WOOD SURFACES

Introducing the Anvil Line

Introducing the Anvil line, a revolutionary new series of metal gilded wood surfaces available exclusively from Grothouse. This unique new product line employs masterful finishing techniques to coat wooden countertops in a finish of real metal particles, creating a sophisticated surface that imitates metal in look and function.

When applied to real wood surfaces, Anvil finishes allow the natural grain and imperfections of the wood to show through. This creates a rich design aesthetic that combines the natural look of wood with the modern look of metal finishes.

Unlike traditional metal countertops, Anvil can be used in curved profile applications and complex shapes not previously possible in sheet metal products. Select a composite substrate to replicate the look of a real metal surface.

Anvil countertops, just like real metal, develop a rich aged patina over time. Slight imperfections and variations in color are inherent in the finishing process.

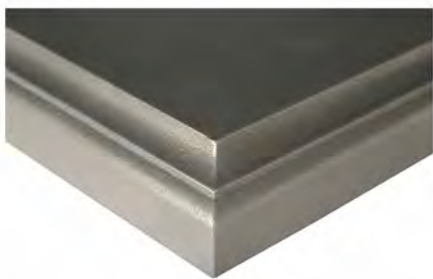

- Exterior rated when combined with our composite substrates
- Available with any Grothouse edge treatment
- Lead time is 6-8 weeks.
- Optional overcoat of exclusive Durata® Waterproof Permanent Finish
- Easy to clean
- 1 Year Warranty

The Grothouse exclusive Anvil line is available in 8 metal coatings which take on completely different characteristics depending upon the wood or substrate they cover, making it an incredibly versatile surfacing option.
