

CUSTOM FLOATING SHELVES

With this new product offering, Grothouse expanded the capabilities of floating shelf systems. Our solid wood shelves are available in all species, finishes and construction styles currently offered by Grothouse. The innovative new features we are introducing are:

- **Substantial strength over previously available systems.**

A 100 lb. rating per 2' increment with ***NO SAG!** * Limitations on strength are the fasteners used for installation and the studs/blocking they are attached to, not the shelves or support systems.

- **Easy installation allows for:**

- Tolerance for out of flat walls or studs. In most systems the installation of floating shelves is very finicky because the brackets must be installed parallel to slide the shelf on; if your wall is even slightly out-of-flat this is often difficult. Our system only needs to be installed level. Shims are **NOT** required in most applications.

- Side to side adjustment of 9/16" (each direction) of the shelf on the bracket once the bracket is installed. Shelves can even be scribed on the side and then slid into place.

- Easy on and off with strong attachment using the supplied high-power magnetic installation system. Hardware is completely hidden when installed.

- **Corner Floating Shelf Solutions**

We have solutions for corner shelving when the shelves are open on both sides or with a cabinet on one side. This includes the ability to use either miter or butt joints on the shelves.

- **Optional Integrated LED Lighting**

Lighting is supplied and custom sized for each shelf. In our process, the routing to happens before finishing and installation which means you and your client will have a perfectly finished shelf. Optional items include:

- 3K Warm White or 4K Cool White light temperature.
- Preinstalled White or Smoke diffusers.
- Controls and Drivers are selected for you depending on your needs.

Three-year warranty on all LED components.

Custom wood floating shelves ship in our standard 2 to 3-week lead time. Floating shelves finished with Anvil™ Metal Gilding typically ship in 4 to 6-week lead time. All shelves are supplied with Grothouse' lifetime warranty on the shelves and mounts, and 3-year warranty on LED components.

Our system is designed to expand your design capability with custom floating shelving. Please contact your sales or customer service representative for quotes or more information.

Grothouse Custom Floating Shelves | Details

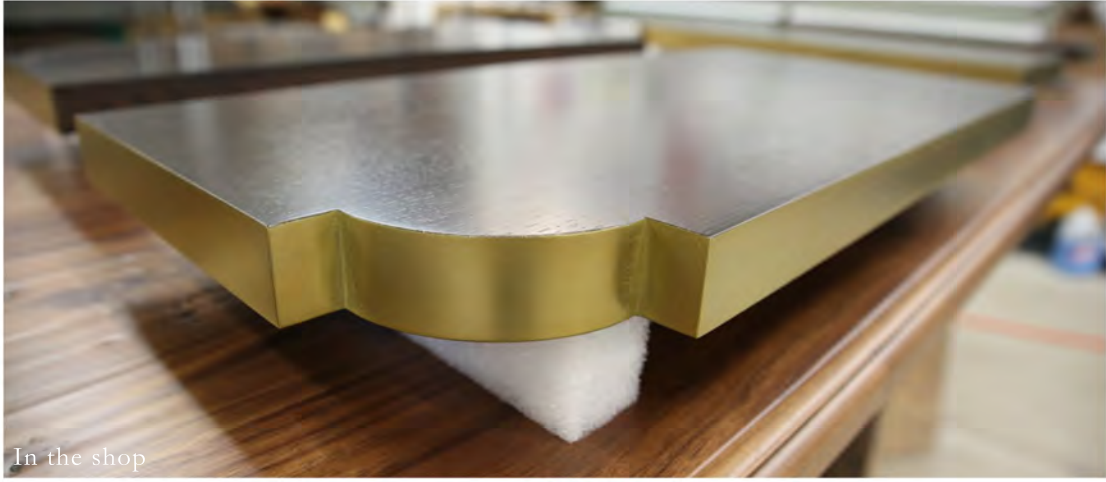

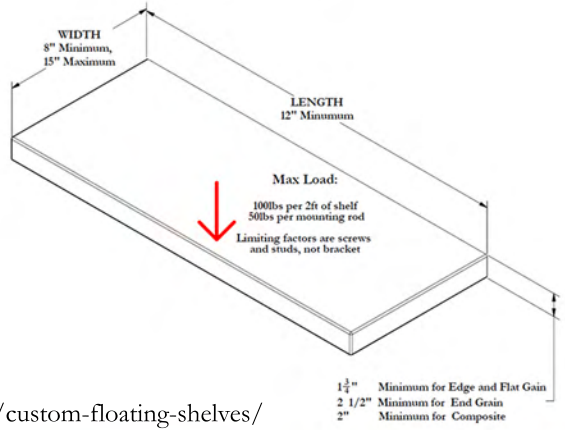

Our proprietary system uses wide shelf slots, solid multi-rod brackets, and a high strength magnetic mounting system.

The backer bar can be drilled wherever the studs are located, and the bracket size is automatically defined for you.

It is as simple as knowing the size of shelf needed. Standard shelf specifications are shown in the diagram to the right.
