

Introducing Grothouse Saxon Wood™

From our specially Curated Series

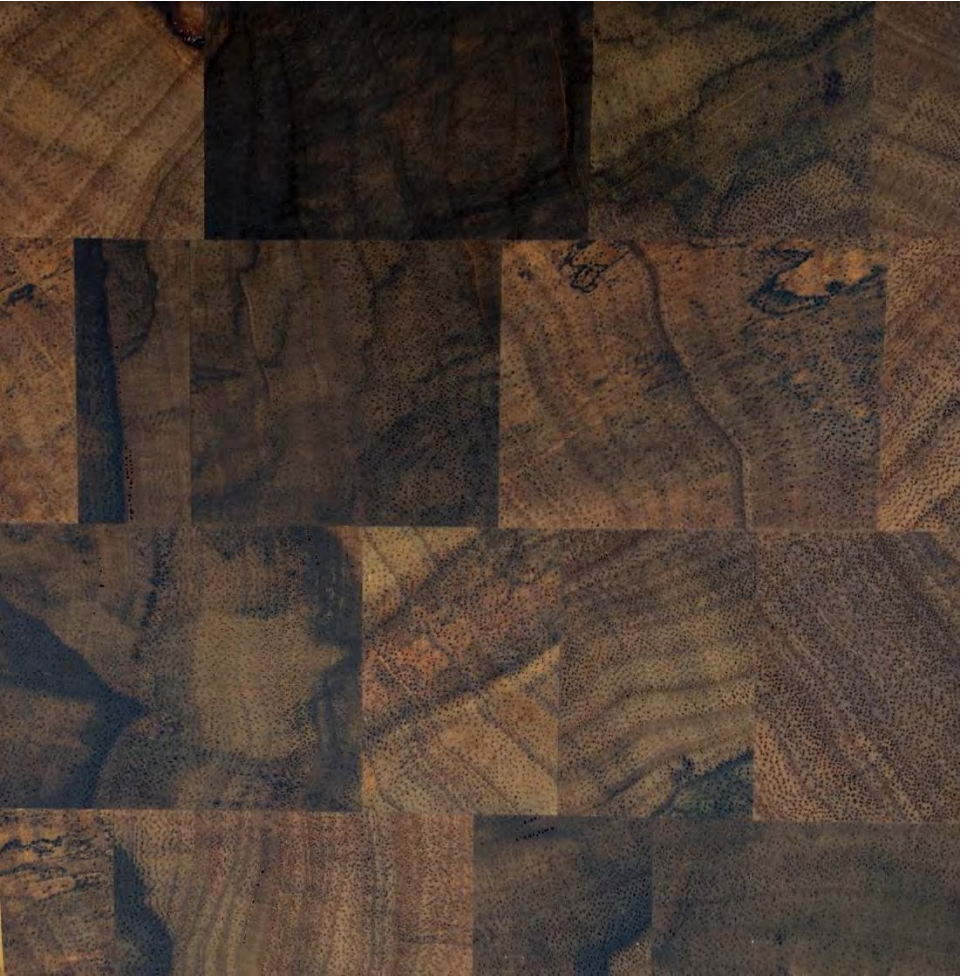

Flat Grain Saxon Wood™

Saxon Wood is the first of a series of specially curated woods, hand selected and sourced by Paul Grothouse. Saxon wood has been chosen for its stunning visual appeal and unique appearance. The wood has base tones ranging from yellow to tan to brown. It is accented with grey and black striations resembling Spalted Maple. The grain is wavy and irregular. The hardness and characteristics of Grothouse Saxon Wood™ closely mirror the Mahogany family.

Saxon Wood™ Details
